### PROFILE

Proven Junior Web Developer from Wreef AI, adept in HTML5 and team collaboration. Significantly contributed to web solutions, enhancing user experiences, and meeting tight deadlines. Skilled in front-end frameworks and project management, excelling in developing scalable applications and integrating cutting-edge technologies.

### PROFESSIONAL EXPERIENCE

#### Junior Web Developer

2022-2023

Wreef AI, Dhaka (Remote)

- Developing and maintaining web applications using HTML5, CSS3, JavaScript, and React.
- Collaborating with senior developers to implement frontend features and user interfaces that enhanced user experience.
- Working closely with the design team to ensure pixel-perfect implementation of UI components.
- Participating in code reviews to improve code quality and ensure best practices.
- Debugging, testing, and resolving frontend issues to ensure smooth application performance.
- Assisting in developing reusable components and modules for scalable web applications.
- Learning and applying modern web tools like Git, Vite, and Agile development practices.
- Contributing to planning and documentation, ensuring web projects met project deadlines and quality standards.

### PROJECTS

#### GameFinder

React, Vite, TypeScript, Node.js

- Platform for Gamers to search for the latest games and explore various genres and types of games.
- Built a dynamic web application using React, Vite, and TypeScript for a fast and efficient user experience.
- Utilized genre-based filtering and search functionalities to enhance user engagement and discoverability.
