CAREER OBJECTIVE

Junior Web Developer with expertise in Python, JavaScript, React, and TypeScript, experienced in both frontend and backend development. Led frontend development projects using ReactJS and developed robust backend APIs with Django and Express.js. Successfully optimized API performance and implemented secure authentication workflows. Eager to leverage full stack development skills to deliver innovative solutions as a Full Stack Engineer.

WORK EXPERIENCE

Imranslab | Full Stack Engineer

Jan 2025 - Present

- Developed and maintained web applications with HTML5, CSS3, JavaScript, and React, leading to a 20% increase in load speed, a 15% rise in user engagement, and enhanced overall user experience through efficient coding practices
- Collaborated with senior developers to implement frontend features and user interfaces, enhancing user experience and satisfaction
- Worked closely with the design team to ensure pixel-perfect implementation of UI components, leading to a visually appealing and consistent user interface
- Learned and applied modern web tools like Git, Vite, and Agile development practices, streamlining development processes and improving team collaboration

Wreef AI | Junior Web Developer

Jan 2023 - Dec 2024

- Developed a responsive, modern business website with dynamic service listings and product showcase pages.
- Built a scalable backend API using Express.js and MongoDB for managing product data and inquiries.
- Implemented secure contact and service request forms with server-side validation.
- Optimized UI performance with React and Tailwind CSS, ensuring fast load times across devices.
- Integrated SEO-friendly routing and metadata for better search engine visibility.

PROJECTS

Munemi Global | <https://munemiglobal.com/> | Munemi Global

Nov 2024 - Apr 2025

- Developed a Learning Management System (LMS) allowing students, parents, and teachers to monitor academic progress.
- Implemented JWT-based authentication and role-based access control for secure login and data privacy.
- Created a modular React frontend with reusable components for course listings, dashboards, and progress tracking.
- Built RESTful APIs in Django REST Framework to handle courses, users, and assessments.
- Optimized database queries with PostgreSQL to ensure fast, reliable data retrieval for large datasets.
